AI

REVENUE INTELLIGENCE

Built for professional events. Designed for Malaysia. Ready to scale across Southeast Asia.

Presented by ALAM CAPITALS BERHAD

www.alamcap.com

A single operating system for the entire event lifecycle

Fundora replaces a patchwork of disconnected tools with one browser-based workspace for engagement, operations and intelligence.

What Fundora changes

Professional events are usually managed across forms, payment links, spreadsheets, personal messaging accounts, social platforms and manual reports. Fundora brings those workflows together and turns the resulting attendee data into commercial intelligence.

ENGAGEMENT

Registration, campaigns, social media, communications

OPERATIONS

Events, attendees, payments, check-in and forms

INTELLIGENCE

AI insights, revenue scoring, segment health and trends

PLATFORM AT A GLANCE

8 Core modules
Full lifecycle coverage

5 Social platforms
Facebook, Instagram, LinkedIn, X, YouTube

2 Payment gateways
Stripe + iPay88

AI Insights engine
Upsell, cross-sell, retention, opportunity scoring

PDPA Built in
Consent, auditability and residency controls

SaaS Multi-tenant
Private, isolated workspace per organisation

From event administration to revenue acceleration

The platform is positioned not only as event software, but as a revenue acceleration engine that identifies high-potential attendees, payment recovery opportunities and cross-event conversion patterns.

Eight fragmented workflows. One connected platform

Fundora replaces manual hand-offs and disconnected systems across the event journey.

Registration

CURRENT REALITY
Google Forms or Eventbrite

FUNDORA
Branded page, custom fields, QR code and PDPA consent

Payments

CURRENT REALITY
Bank transfers or separate payment links

FUNDORA
Stripe + iPay88 checkout, confirmations and receipts

Attendee comms

CURRENT REALITY
Personal WhatsApp and Gmail

FUNDORA
Bulk WhatsApp + email campaigns with delivery tracking

Check-in

CURRENT REALITY
Paper lists and spreadsheets

FUNDORA
QR scanning, manual lookup, live counter and offline support

Social media

CURRENT REALITY
Log in and out of each platform

FUNDORA
Schedule five social platforms from one composer

Analytics

CURRENT REALITY
Excel after the event

FUNDORA
Live dashboards, funnels, revenue recommendations and health scores

Compliance

CURRENT REALITY
Handled ad hoc

FUNDORA
PDPA consent, audit trail and configurable residency

Team access

CURRENT REALITY
Shared passwords

FUNDORA
Role-based access with event-level staff scoping

The source proposal estimates 60–70% of event-team time is lost to operational overhead.

Fundora is designed to shift that time back toward attendance growth, sponsor engagement and event experience.

The full event lifecycle in one workspace

Cloud-native, browser-based and multi-tenant. Each organisation operates inside a private workspace with role-based access.

Core capability groups

Built for the moments that determine attendee experi

From campaign outreach to the venue door, Fundora keeps communication and attendance data connected.

Campaigns meet real event behaviour

WhatsApp, email, social, QR check-in and attendance all feed the same reco

Campaign Management

AI-assisted templates, segmented WhatsApp/email outreach, scheduling and delivery metrics.

QR Check-in

Camera-based scanning, manual search, live check-in feed, progress counter and offline operation.

Prospect Finder

Search professionals by keyword and location; push selected prospects directly into campaigns.

Social Media

Compose once, schedule/publish across Facebook, Instagram, LinkedIn, X and YouTube.

Communications Hub

Unified message history across WhatsApp, email and SMS with searchable audit trail.

Form Builder

Text, number, dropdown and checkbox fields; required/optional logic and per-attendee responses.

One data trail from first click to final check-in

The operating model reduces spreadsheet hand-offs and makes campaign response, payment status and attendance visible in the same workflow.

Turn attendee data into commercial action

The source specification describes an AI engine that continuously analyses attendee behaviour, payment patterns and campaign performance.

- 01 Upsell recommendations

Find visitors and free-tier attendees whose profile resembles paid delegates.
- 02 Cross-sell recommendations

Map overlap between events and identify the attendees most likely to register next.
- 03 Retention & at-risk alerts

Surface registered-but-unpaid attendees and prompt targeted recovery campaigns.
- 04 Revenue & health scoring

Estimate registration gaps, upgrades and segment health on a 0–100 index.

Connected to the tools teams already use. Isolated by

Credentials are configured per workspace, while role-based access and tenant isolation protect organisational data.

Integration ecosystem

Security & compliance

- Secure session management and bcrypt password hashing
- Email verification and time-limited phone OTP
- Role-Based Access Control: Admin and event-scoped Staff
- SSL/TLS, HTTPS enforcement and encryption at rest
- DDoS protection, WAF and audit logging
- PDPA: explicit consent, timestamps, data minimisation, access/export and residency controls

True multi-tenant SaaS

- Private, isolated workspace for each subscribing organisation
- Every database query scoped by tenantId
- API credentials stored within the client workspace
- Independent subscription limits and feature access
- Architecture supports tenant subdomains, logos and brand colours
- Horizontal scaling: new workspaces can be provisioned without rebuilding the platform

TENANT A

TENANT B

TENANT C

SHARED PLATFORM • ISOLATED DATA

Designed around professional event operators with re

The platform specification targets organisations running recurring, paid, regulated or high-volume events.

Built for repeatable, professional event operations

Conference & Expo Organisers

Annual and recurring conferences, trade expos and industry summits with 200–5,000 attendees.

Healthcare & Medical Associations

CME conferences, clinical workshops and public health events where consent and credential capture matter.

Financial & Professional Services

Investor briefings, regulatory training and professional programmes where payment reconciliation and proof of attendance matter.

Corporate Training Providers

Paid workshops and certification programmes with registration, payment, attendance and learner administration workflows.

Government & Public Sector

Stakeholder forums and public programmes where data security, audit trails and PDPA controls are non-negotiable.

Save operating time. Recover revenue. Reduce avoida

The proposal quantifies the impact across event setup, communications, check-in, reporting and monetisation.

Time savings per workflow

200+ HOURS

Conservative annual staff-time saving

for an organisation running six events per year, as estimated in the source proposal.

Illustrative revenue recovery examples

MYR 25,000

Visitor-to-delegate conversion

10% of visitors upgraded on a 500-person event at MYR 500/delegate.

MYR 15k–40k

Pending-payment recovery

Targeted WhatsApp nudges recovering a portion of registrations that have not paid.

30–40%

Repeat registration uplift

Cross-selling the next event to an engaged attendee base.

Risk reduction built into the operating model

PDPA-by-design controls, automatic payment updates and cloud-hosted records are positioned to reduce compliance incidents, reconciliation errors and spreadsheet-driven data loss.

Malaysia-first capabilities without a custom-build price

The source proposal positions Fundora against Eventbrite, Eventzilla, Hubilo and custom development.

FEATURE	FUNDORA	EVENTBRITE	EVENTZILLA	HUBILO	CUSTOM
WhatsApp campaigns	Native	No	No	No	Integration
AI revenue insights	Native	No	No	Limited	Build
PDPA compliance	Built-in	No	No	No	Build
iPay88 Malaysia	Native	No	No	No	Build
Social scheduler	5 platforms	No	No	No	Integration
QR check-in	Native	Add-on	Basic	Yes	Build
Prospect finder	Native	No	No	No	Integration
Multi-tenant isolation	Enterprise	No	No	Yes	Complex
Form builder	Native	Limited	Basic	Yes	Build

Positioning: local rails + AI + full-lifecycle operations

The proposition is strongest where Malaysian payment methods, PDPA-oriented workflows, WhatsApp-first communications and revenue intelligence need to coexist in one SaaS platform.

Three platform tiers with a clear enterprise expansion

The pricing and roadmap below follow the source proposal. Features and commercial terms remain subject to change.

STARTER

MYR 299 / month

- Up to 3 active events
- 200 attendees / event
- 3 staff users
- 1,000 email sends / month
- 500 WhatsApp sends / month
- Basic AI insights
- 3 social platforms
- Stripe
- 3 custom form fields
- Full PDPA compliance
- Email support
- 99.5% uptime

PROFESSIONAL

MYR 799 / month

- Up to 12 active events
- 2,000 attendees / event
- 10 staff users
- 10,000 email sends / month
- 5,000 WhatsApp sends / month
- Full AI insights
- All 5 social platforms
- Stripe + iPay88
- 10 custom form fields
- Full PDPA compliance
- Priority email + chat
- 99.9% uptime

ENTERPRISE

CUSTOM

- Unlimited events
- Unlimited attendees
- Unlimited staff users
- Custom messaging volume
- Custom WhatsApp volume
- Full + custom AI models
- All 5 + scheduling queue
- Stripe + iPay88 + custom
- Unlimited form fields
- Full + DPA officer tools
- Dedicated account manager
- 99.95% + custom SLA

Annual subscription pricing: 2 months free, as stated in the source proposal.

Strategic roadmap

NEAR-TERM • Q3-Q4 2025

Certificates • Sponsor portal • Event website builder • Mobile app

MEDIUM-TERM • 2026

Streaming integrations • Abstract submission • CME/CPD tracking • Revenue sharing • Advanced reporting

LONG-TERM • 2026-2027

AI matchmaking • Predictive attendance • Multi-currency & language • API-first mode

Why now

01 Post-pandemic recovery

Live event volumes have rebounded while organiser teams remain lean. Technology has to absorb more operational load.

02 Regulatory pressure

The proposal positions PDPA-oriented consent, auditability and residency as central requirements for Malaysian event operators.

03 WhatsApp-first engagement

Fundora is built around WhatsApp as a primary event communication channel rather than an afterthought.

04 AI accessibility

Revenue recommendations and segment analysis can now be delivered inside an SME-priced operating platform.

05 Regional market gap

The product thesis is that global event tools do not combine local payments, local communication habits and Malaysian compliance needs.
